About Us (2)

DMS - Displays & Mobility Solutions

DMS is a subsidiary of Microprocessador Sistemas Digitais, SA (MP) which was founded in 1979. (www.microprocessador.pt)

In early 2015, DMS - Displays & Mobility Solutions, Lda. was created with the aim of focusing and developing our activity in public information systems and the road transport sector.

DMS is a provider of solutions for:

- Electronic Information Products and Systems for the Public;
- Security and Mobility Solutions for the Transport Industry.

DMS designs and develops information equipment for the public, including electronic information panels:

- Variable Signs Panels for traffic management and road safety.
- Information panels for stops and platforms for public transport.
- Embedded Information Panels for the public transport industry.
- Signs and information panels for parking management.
- Electronic Information Panels for different types of applications.

Our goal is to provide our customers with high quality solutions accompanied by an excellent service, maintaining the well-being of both our employees and the environment as a priority.

Values that pave the way to progress and innovation

Our culture is intertwined with our mission.

We strive for:

- Ensuring the satisfaction of our customers by providing them with technologically updated products and services adapted to their needs, exceeding their expectations and adding value.
- Promoting a creative and innovative attitude, with permanent technological updating, continuous training of our human resources, as an essential basis for our current and future success.
- To comply with all legal and other relevant requirements, to be a company responsible to society, the environment and our employees.
- To offer our shareholders attractive profitability and sustained growth.
- To be a company of which our employees are proud.
